Clarity in every moment.

FloTrac sensor
The easy and reliable solution for fluid management. Less invasive, the FloTrac sensor easily attaches to an existing arterial catheter and automatically adjusts for changes in vascular tone.

PreSep and PediaSat oximetry catheters
Continuously monitors central venous oxygen saturation (ScvO₂) and provides the security of an early warning by detecting critical changes in hemodynamic status earlier. The PediaSat oximetry catheter offers early warning specifically for pediatric patients.

GlucoClear system*
Delivers continual blood glucose monitoring and offers precision and efficiency for optimal glucose management.

Swan-Ganz pulmonary artery catheters
The single, continuous and comprehensive solution for assessing the hemodynamic status of your most critical and complex patients.

VolumeView set*
Provides a new view of volumetric and fluid management parameters. Intended for use in acutely ill patients, including in the treatment of pulmonary edema, acute lung injury (ALI) or acute respiratory distress syndrome (ARDS).

Continuous ScvO₂ (PreSep/PediaSat oximetry catheters)

CO, SV, SVR, SVV, SVI, EVLW, PVPI, GEDV, GEF (Swan-Ganz catheters)

SvO₂, CCO, RVEDV, RVEF, SV, SVR, PVR, RAP, PAOP (VolumeView set)

SVR/SVRI, SVV, SVI, CCO/CCI (FloTrac sensor)

Automated Glucose Monitoring (GlucoClear system)

Central Venous Access and Pressure Monitoring (Multi-Med, Vantex, AVA HF, TruWave, VAMP)

EV1000 clinical platform*
Presents the physiologic status of the patient in an entirely new, intuitive and meaningful way—offering maximum scalability and adaptability for the OR and ICU. The platform was thoughtfully designed to allow you to choose your own personal view, choose your parameters, and choose your level of invasiveness. Works with the FloTrac sensor, VolumeView set and PreSep and PediaSat oximetry catheters.

*EV1000 clinical platform and VolumeView sensor available exclusively for clinical investigation. VolumeView combo kit and GlucoClear system CE marked. GlucoClear system available in the US exclusively for clinical investigation.
Change happens in an instant. That is why everything we do is focused on providing the clear information you need, how you need it, in the moments you need it most.

We strive to understand the challenges you face daily. Close collaboration with you enables us to create meaningful solutions to these challenges—along with educational programs to support you and research investments that fuel advancements to come.

After 40 years of helping clinicians advance the care and treatment of the critically ill, the goal of Edwards Lifesciences remains: to provide the clarity you need, each and every moment you need it.
