Atraumatic Occlusion

The Edwards complete line of clamp inserts, spring clips and handleless clamps provide a variety of solutions for atraumatic vessel occlusion. The combinations of atraumatic jaw surfaces offer a range of resilience and traction needed for distinct vessel conditions and procedures.

Spring Clips
Provide a consistent degree of tension. The Edwards EverClip reduced-force spring clip minimizes vessel trauma while maintaining occlusion.

Clamp Inserts
Available in 33mm, 61mm and 86mm sizes for the widest range of procedures. Edwards EverGrip inserts provide an ideal combination of resilience and traction.

Handleless Clamps
Incorporate a ratchet-type mechanism that can be adjusted for the precise degree of pressure desired.

The entire line of atraumatic occlusion products is latex free.
