Edwards offers multiple femoral venous cannulae options to accommodate a variety of surgeon preferences:

- QuickDraw femoral venous cannula
- FemTrak femoral venous cannula
- VFEM femoral venous cannula
- Fem-Flex II pediatric femoral venous cannula

Edwards femoral venous cannulae feature ultra thin wall design to help maximize venous drainage.
QUICKDRAW FEMORAL VENOUS CANNULA

• Thin wall, wire-wound design allows for excellent flow characteristics
• Large, interspaced drainage holes allow for consistent, uninterrupted venous drainage
• Can be used with vacuum or kinetic assist venous drainage to augment venous flow and drainage of the heart

VFEM FEMORAL VENOUS CANNULA

• Proprietary ultra thin wall technology enhances flow and flexibility
• Polyurethane body with wire reinforcement helps prevent kinking
• Dilator locks in full extended position for smooth insertion
• Tapered tip, smooth dilator-to-cannula transition facilitates insertion
• Variety of lengths to accommodate most patients: 55 cm and 68 cm
• Radiopaque tip allows visualization during placement
FEMTRAK FEMORAL VENOUS CANNULA
• Metal ferrule and precision designed cannula provides an atraumatic, smooth transition between cannula and introducer
• Tapered auto-dilating tip
• Soft, flexible tip navigates through tortuous anatomy
• Proprietary ultra thin wall technology optimizes flow

Metal Ferrule
• Provides a smooth transition between cannula and introducer
• Allows easier and less traumatic insertion

Tapered Auto-Dilating Tip
• Easily follows guidewire
• Allows for fewer dilation steps

Locking Introducer
• Prevents retraction from cannula
• Decreases likelihood of damaging vessel wall

FEM-FLEX II FEMORAL VENOUS CANNULA
• Indicated for pediatric patients
• Polyurethane body with wire reinforcement helps prevent kinking
• Designed with ultra thin wall technology for enhanced flow and flexibility
Femoral Venous Cannulae
